The Effect of the Earth’s Atmosphere on LSST Photometry

Alexandra S. Rahlin

Office of Science, Science Undergraduate Laboratory Internship (SULI)
Massachusetts Institute of Technology
Stanford Linear Accelerator Center
Stanford, CA

August 7, 2006

Prepared in partial fulfillment of the requirements of the Office of Science, Department of Energy’s Science Undergraduate Laboratory Internship under the direction of David L. Burke at the Kavli Institute for Particle Astrophysics and Cosmology, Stanford Linear Accelerator Center.
